BY ORDER OF THE TOWN BOARD OF THE TOWN OF CHEEKTOWAGA, COUNTY OF ERIE, AND STATE OF NEW YORK.

Dated: August 7, 1978

RICHARD M. MOLESKI
Town Clerk

Item No. 9

Motion by Councilman Wegner, seconded by Supervisor Meyers

WHEREAS, various areas within Sanitary Sewer District No. 7 in the Town of Cheektowaga have experienced sanitary sewer back-ups in basements and what appears to be possible inflow and infiltration of storm water into the sanitary sewer system, and

WHEREAS, the Town is presently engaged in vast capital improvements to its sanitary sewer system in said district, and

WHEREAS, it appears necessary to further examine the laterals, sewer lines and other related connections and facilities upon various parcels of real property occupied by Town residents in said district in order to attempt to find the cause of the back-ups and basement floodings as they relate to, and affect, the sanitary sewer system, and

WHEREAS, it appears that a Pilot Project which would include the submission of applications by any interested property owner who is adversely effected by sanitary sewer back-up problems in the homeowner's basement, or storm waters in the basement or adjacent ground area which may be suspected to be infiltrating the sanitary sewer system is necessary and appropriate, and the Town Board would within a specific period of time choose, at random, eight to ten homes for said Pilot Project, and

WHEREAS, the Town Board, acting as the Board of Managers of Sanitary Sewer District No. 7 and the Town Engineer would select the eight to ten applicants which in their judgment would compose, as a group, an over-all sampling of the potential cause of storm water inflow and infiltration into the sanitary sewer system with the ultimate objective to correct any defects resulting therefrom, and

WHEREAS, it appears that such a project would benefit all of the area of Sanitary Sewer District No. 7 and its residents and its purpose is not to benefit any individual property owners and would seem to be consistent with, so far as possible, a comprehensive plan for sanitary sewers developed and maintained in said district, and

WHEREAS, said Pilot Project appears to be permissible under the applicable provisions of Section 198 of the Town Law whereby the Town can expend monies for such purposes from the Sanitary Sewer District No. 7 funds as budgeted by the Town, therefore, BE IT

RESOLVED that the Pilot Project as above set forth be and hereby is adopted by the Town of Cheektowaga and the details of implementing such Pilot Project including notices to owners, furnishing of applications and arranging for agreements between the selected owners and the Town for permission to allow Town employees and its agents or contractors to go upon the selected properties to do said work be arranged and submitted by the Town Engineer and the Town Attorney's Office, and BE IT FURTHER

RESOLVED that the expenses of such project, including labor and materials, be paid for, if possible, from Comprehensive Employment Training Act funds and C.E.T.A. laborers and, if necessary, to be paid out of and charged to Sanitary Sewer District No. 7 budget.

John Gruber, Acting Police Chief

DATE: June 19, 1978

Since December 1976, the Cheektowaga Management Improvement Committee has studied the scope of work in several departments which have related duties and responsibilities. In August 1977, the Committee's observations indicated that the Parks Department, Building and Maintenance Department, Utility Department and Plumbing Department all provide services of a maintenance nature. The Committee recommended a merger of these departments into one department for the purpose of reaching the below listed goals:

1. Coordination of all manpower for more effective utilization.
2. Combined purchasing including volume buying and supply standardization.
3. Best utilization of equipment.
4. One budget for effective cost control.
5. Clear lines of authority and responsibility.
6. Long range unified planning in Town building and ground maintenance.
7. Centralized inventory control of supplies and equipment.

The Town Board requested additional specific information for consolidation decision making guidance in February, 1978. Ronald Zoeller, of the Management Improvement Committee, was authorized to conduct a detailed study of the operations of the Parks, Utility, Building Maintenance and Plumbing Departments and to furnish periodic reports of this study to the Management Improvement Committee and the Town Board.

Such reports were submitted and the Management Improvement Committee held six (6) subsequent meetings reviewing and deciding final recommendations to present to the Town Board regarding consolidation of departments.

The report covered the following areas of concern for the four (4) departments:

1. Existing manning by classification and numbers of employees.
2. Organizational listings, including job title, employee name, job longevity factor, skills rating, job location and workshift for full time permanent, full time CETA and permanent part time employees.
3. Organization charts of existing supervisory, administrative, and clerical positions and recommended supervisory, administrative, and clerical positions for department consolidation.
4. Summary opinions and recommendations for major area categories of concern, including Personnel Strength, Purchasing/Inventory Control, Work Distribution, Supervisory Styles, Operating Practices, Efficiency, Overtime, Layout/Facilities, Equipment, and 1977 Total Payroll Costs.
5. A plan to consolidate Town snowplowing.

6. A plan to consolidate Town lawn mowing.
7. Dollar amounts and vendor listings for 1977 volume purchases by category: janitorial equipment and supplies, hardware items, paint, lumber, electrical items, nursery and lawn items, office supplies, chemicals, building supplies, plumbing items, and athletic equipment and supplies.
8. 1977 subcontract experience by dollar amount and vendor.
9. Vehicle, accessory and equipment inventory listings.

A tenth item of concern, office supply purchasing practices, which has been reviewed town wide is also subject to consideration.

The Management Improvement Committee recommends consolidation of departments. The benefits derived are assignment coordination, assignment priority, better purchasing techniques, and improved equipment and supply cost control and utilization. It is important to note that all functions of the four (4) existing departments are related in the categories of building and grounds maintenance and construction, and custodial work with one exception, the specialty operation of the ice rink. The following are the recommended department consolidation concepts:

1. Supervisory Organization - (Reference Attachment I)

It is recommended that a single department head will be accountable for managing the consolidated department. Three (3) supervisors are recommended to cover all maintenance area functions, while a fourth supervisor would cover all custodial functions as well as administration of all departments purchasing. Realignment of existing supervision is necessary. Incumbent personnel job stability and job placement and morale consideration is necessary.

The existing work force totals sixty-three (63) employees. The recommended consolidation organization will ultimately number fifty-three (53) employees providing present work loads remain stable. Seven (7) supervisory positions will be reduced eventually to five (5) supervisory positions through consolidation.

Zoeller's recommendation call for two (2) major divisions of work functions; one being "building and grounds maintenance and construction" and the second being "custodial functions" and "purchasing responsibility" for the consolidated department. In essence, one (1) existing department head will be responsible for building and ground maintenance and construction and one (1) existing department head will be responsible for custodial work of all Town buildings as well as the purchasing functions of the Consolidated Department. The Plumbing Department head position will be dropped. Two (2) existing foreman positions will be allocated to the maintenance section and one (1) existing foreman position will be assigned to the custodial functions. This organizational realignment will produce the most efficient operational set up and provide job stability and security for incumbent supervision. No section of the Consolidated Department will report to the Town Engineer. The Consolidated Department head will report directly to the Town Board.

2. Department Manning - (Reference Attachment I)

Realignment and reduction of Personnel Strength is a natural outgrowth realized through consolidation. As noted above, sixty-three (63) employees are presently employed in the four (4) departments. The Maintenance and Custodial work force shall be reduced through consolidation. Twenty-five (25) maintenance and twenty (20) custodial employees will satisfactorily fulfill work load requirements through work assignment by effective management organization and planning.

Below listed is a schedule outlining how the consolidated work force may be reduced by ten (10) employees to a consolidated department total of fifty-three (53) employees. Attrition is the only sellable approach to arrive at the desired manning solution. It is imperative that management negotiate new job descriptions, new job duties and functions, shift changes and work week changes with the bargaining unit in order to improve productivity and to facilitate the planned reduction in the work force.

Immediate Savings:

	<u>Annual Savings</u>
1. Eliminate part time laborer position at Town Hall - four hour shift - 4:00 P.M. to 8:00 P.M.	\$ 2,600.00
2. Eliminate cleaner position - Town Hall - day shift - 8:00 A.M. to 4:30 P.M.	\$15,047.00
3. Eliminate one (1) laborer position (transfer one (1) full time permanent employee to sewer department opening)	\$15,000.00
4. Eliminate Plumbing Department foreman position. (Replace with Master Plumber position)	Improved Efficiency
5. Reduce 1978 overtime hours and premium overtime payment.	\$ 5,000.00
6. Improve management's rights to operate effectively through negotiation of Town-Union Agreement contract language in 1978 contract negotiations.	Improve Operational Problems

Near Term Savings:

1. Expected retirements - attrition - no replacement - four (4) laborer and/or caretaker positions (transfers to other departments where applicable)	\$60,000.00
2. Purchasing of department supplies via bidding procedures.	\$ 8,500.00
3. "Town" wide office supply Central Purchasing (and bidding) section. Include in 1979 budget.	\$ 9,000.00
4. Snow plowing and lawn mowing consolidation	\$13,000.00
5. Tear down existing maintenance building and garage (annual energy savings) - 1979	\$ 2,600.00

Anticipated Later Savings:

1. Expected retirements - attrition - no replacement - four (4) laborer and/or caretaker positions (transfers to other departments where applicable)	\$60,000.00
2. Truck fleet, fleet accessory, and equipment inventory reduction	\$20,000.00
3. Reduced subcontract work	\$ 9,000.00

Consolidated Department budget (1979) should be judiciously reduced to allow for work force reduction. Control is required.

For consolidation goal attainment, it is essential to revise all job descriptions for all positions to create flexibility of assignment. Certain job titles such as "caretaker" need review for elimination. Certain positions such as "general mechanic" at Maryvale and Dartwood Community Centers, should be downgraded.

A change which must be implemented is the elimination of all day shift custodial personnel in the Police Court Building and Town Hall, and a revised work week schedule which covers the seven (7) day week, not Monday - Friday. Custodial services should not be performed in active offices.

A licensed electrician and master plumber should be woven into the consolidated work force. Two (2) or three (3) lesser positions should be dropped to balance this cost. Future consideration should be given to hiring an experienced heating/air conditioning specialist and dropping a maintenance laborer position.

3. Snowplowing Consolidation - (Reference Attachment II)

A plan and schedule has been developed to conduct a Town snowplowing service on the third shift for service roads, entrances and parking lots for all Town departments and facilities. Labor savings of \$6,600.00 annually will be realized. The work force must be condensed by eight hundred twenty-five (825) hours annually.

4. Lawnmowing Consolidation - (Reference Attachment III)

A plan has been developed to conduct a Town grass cutting service for Parks, areas surrounding Town Hall, Police-Court building, Highway and Sanitation buildings, Utility-Sewer-Plumbing building, and three (3) Libraries. No trimming included. Labor savings of \$6,400.00 annually will be realized. The work force must be condensed by eight hundred (800) hours annually. Four (4) riding lawn mowers, valued at \$4,000.00 can be removed from equipment inventory. Replacement is not necessary.

5. Purchase/Inventory Control

Present methods of purchasing in the four (4) departments are individualized according to operational demands and habits.

Other than the Parks Department, entrance into bidding practices on certain buy items in 1977 and early 1978, no significant cost control methods have been employed by any of the four (4) departments, except in isolated Federal Funded programs. Utility and Building and Maintenance do not bid. Buy cards, inventory cards, minimum-maximum order points, purchasing requisitions, and normal control records are virtually nil. Each department secures its parts and tool inventories in varying degrees. Materials, tools, and protable equipment are vulnerable to theft and loss. Inventory security practices can be tightened appreciably.

Controlled bidding and purchasing practices can be standardized in an organized manner via department consolidation. Improvement recommendations include bidding-unit and blanket-on all items where annual volume or expense dollars warrant. Centralized purchasing must be capable of future expansion to all town departments.

A survey of 1977 volume purchase items within the four (4) departments indicates dollars spent at \$95,000.00 in the categories of janitorial equipment and supplies, hardware items, paint, lumber, electrical items, nursery and lawn items, office supplies, chemicals, building supplies, plumbing items, and athletic equipment and supplies. Annual dollar savings on these items through bidding practices is estimated at \$8,500.00. (See Attachments V & VI)

Additionally, the bidding of office supplies Town-wide should be incepted immediately. Detailed listings of all office supplies with quantity ranges should be bid periodically. The Town Clerk's office has offered to administrate purchase of office supply items. Accompanying partial, sample surveys indicate an annual savings of \$4,500.00 as a result of bidding office supplies. (See Attachment IV) Further, according to a 1975 Town office supply survey conducted by Eaton Office Supply, annual Town office supply expenses were \$35,000.00; now, with inflation an estimated \$40,000.00, annually, resulting in an estimated savings of \$9,000.00 annually on all office supplies.

Subcontracting by the four (4) departments in the area of electrical construction, snowplowing, and some parks equipment restoration work are areas of concern.

Attention must be given to the placement of a licensed electrician within the consolidated departmental work force. Reduction of personnel in the laborer classification will offset this cost. The upgrading of this skill will reduce electrical subcontract expenses by an estimated \$9,000.00 annually. (See Attachment VII)

The Consolidated Department clearly has the skills and capability to perform snow plowing and parks equipment restoration work which as heretofore been subcontracted. Estimated savings - \$5,000.00/year. Nursery subcontract work and minor concrete repair subcontracting should be reviewed for further savings. (See Attachment VII)

Future consideration should be given to implementation of Common Product Purchasing for all Town Departments.

An Inventory Control System including card file identification and location in storage information should be incepted for all supplies and equipment. This will provide base information for purchasing cost control as well as loss and theft control.

6. Overtime

Assigned 1977 overtime in the Building & Maintenance Department was minimal (448.5 hrs. in 1977) and not a serious factor for comment.

Parks Department overtime dollars appear significant. Twenty-six thousand two hundred eighteen dollars and forty-nine cents (\$26,218.49) was spent for overtime payment in 1977. This overtime primarily covered absentee assignments. The Parks Department average 2.444 employees absent daily in 1977, 10.2% of the full time work force of twenty-four (24) employees.

A detailed study is recommended in this area to reduce overtime by rescheduling manpower in cases of absence. Absences are largely uncontrollable due to the fringe benefit package.

Utility Department overtime in 1977 totaled 1,700 hours +. Converted to \$'s, overtime cost approximately \$14,000.00. Major overtime assignments included voting machine tasks, roof repairs, rip rap, and sewer work. One third (1/3) of this overtime can be eliminated by regular work week scheduling. Savings per year: \$5,000.00.

7. Layout/Facilities

The preponderance of Parks, Utility, Building Maintenance and Plumbing work functions are performed throughout many areas of the Town.

Department locations, therefore lose importance and may be situated anywhere.

Management and administrative functions, (including purchasing), however, should be in proximity to each other to permit optimum communications and control, and to coordinate staff and employee assignments.

It is recommended that the Incinerator building be revamped to house all coordinated department supervision and clerical assistance. Parts inventory, tooling and equipment inventory can also be securely housed in this facility. It is centrally located in the Town and convenient to Town Hall headquarters.

Further, it is recommended to tear down the existing Building Maintenance building and garage. Two thousand seven hundred fifty-nine dollars and forty-two cents (\$2,759.42) was spent in 1977 energy and maintenance upkeep costs. The 1978 Building Maintenance budget included:

Electricity	\$ 500.00
Gas	400.00
Water	100.00
Repair	1,000.00
Building Maintenance	600.00
Total	<u>\$2,600.00</u>

These monies can be saved annually. Further, the existing buildings are an eyesore on the main thoroughfare, Broadway. Other space within the Town can be analyzed to group the Consolidated Department.

8. Equipment

Current inventory of Dump and Pick-up trucks is required by each of the four (4) departments as they now operate. Consolidation will permit a detailed study of truck assignment, coordination, and overlap for the purpose of reducing the amount of the Dump and Pick-up truck fleet. Definitely, consolidation will result in reduction of trucks, snow plows and standardization of lawn care equipment. Perishable tool inventory will be reduced. Certain truck tonnage and cost can be downgraded. Estimated savings in fleet, fleet accessory and equipment inventory - \$20,000.00.

9. Union Agreement

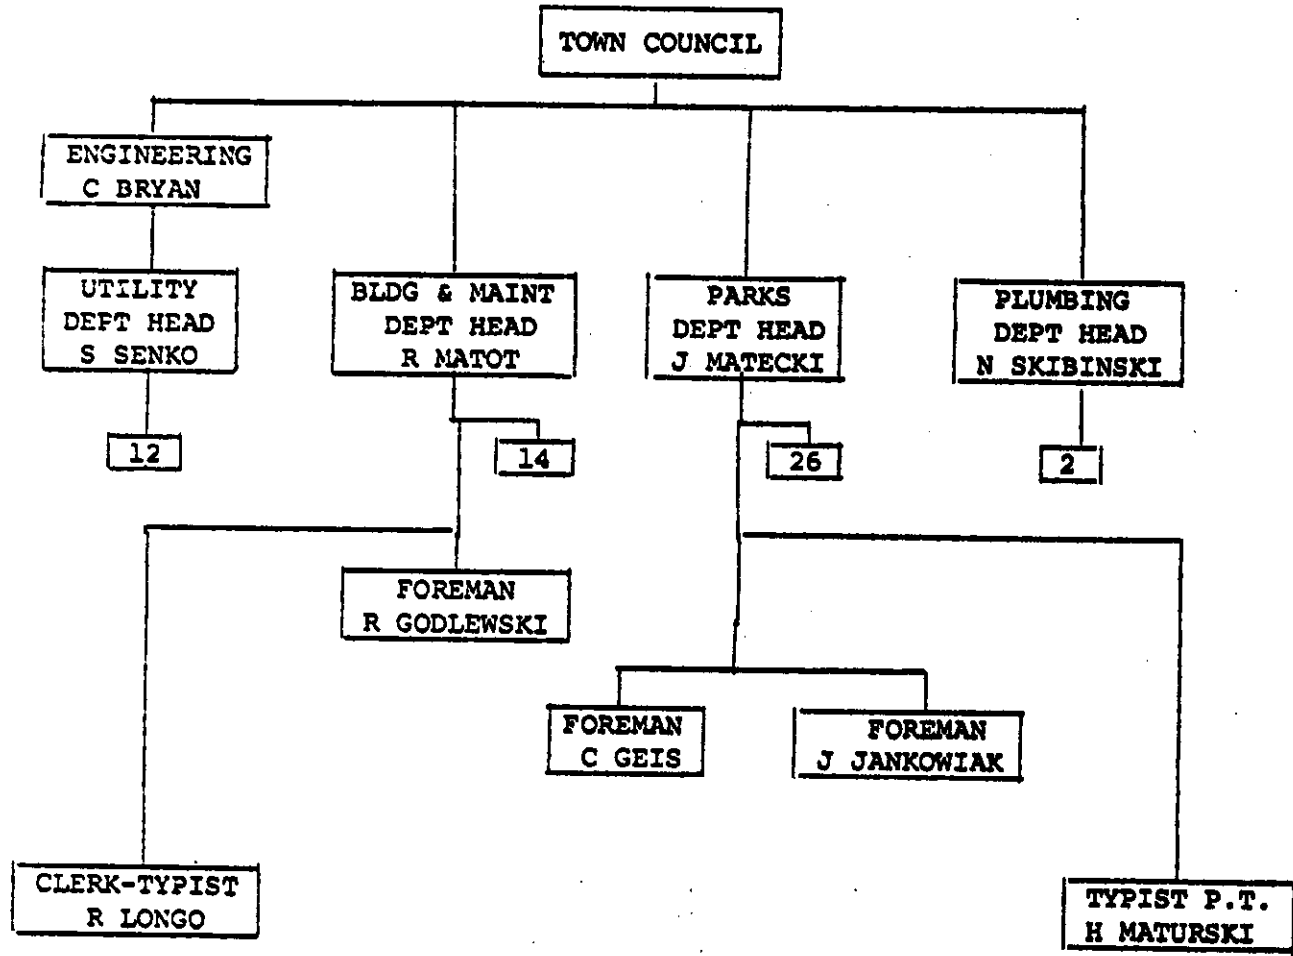

Needless to say, the language in the Union Contract does little to favor or even stand off daily operational problems by Town supervision with the bargaining unit. Ambiguity prevails in interpretation, and where specifics are warranted, they are lacking.

Areas which require language interpretation improvement include:

hours of work	work shift
inclement weather	lunch periods
union business	promotions, transfers, job postings
discipline/discharge	work rules
part time employees	job descriptions

RE: Award of Bid for Furnishing
Infra Red Heaters for the
Sanitation Garage

Gentlemen:

At a regular meeting of the Town Board on June 15, 1978, bids were received and opened for the furnishing of infra red heating units for the Sanitation Garage. Three (3) bids were received and are as follows:

Lauders Equipment Company	\$3,039.00
Engineered Air Division	\$6,961.00
Fitz-Air	\$10,830.00

Specifications were written to furnish a tubular type infra red heating system with reflectors similar to units observed in other County, Town and Village vehicle storage garages. The two low bids submitted were for unit open flamed infra red heaters and did not comply to the specifications.

Mr. Ron Zoeller and the writer made an extensive study of many heating systems, visited different County, Town and Village installations and discussed their installations with their managers.

It was evident that the tubular infra red heating system was the best installation for this facility considering service, economy and efficiency.

It is, therefore, recommended that the contract for furnishing

Re: Town Hall Site Work
and Paving Bids

Gentlemen:

At the regular Town Board Meeting of August 7, 1978, bids were received for the completion the the Town Hall Project by inclusion of work for the reconstruction of the front stairs and the provision drainage, lighting and additional parking facilities. Five (5) bids were received as follows:

BIDDER	TOTAL BID	ALTERNATE BID NO. 1	ALTERNATE BID NO. 2	NET BID
Schreiber Hauling Co.	\$176,733.00	- \$16,282.00	- \$24,500.00	\$152,233.00
Destro & Bros. Concrete Co.	174,721.24	- 28,617.55	- 18,750.00	155,971.24
George Herman & Associates	204,953.00	- 10,000.00	- 22,900.00	182,053.00
Northern Demolition	247,655.00	- 25,200.00	- 19,500.00	228,155.00
Janik Paving	280,456.75	- 20,500.00	- 22,900.00	257,556.75

These bids, as submitted, were in excess of the budgeted amount of \$110,000.00 due to additional work being added to the original proposal. This additional work includes extension of the existing parking lot and provision of new lighting and drainage. It was the opinion of the Building Maintenance Department that they could purchase the lighting standards at a much lower cost than that submitted by the bidders as Alternate Bid Item No. 2.

Re: Town Hall Site Work and Paving Bids

It is the recommendation of the Architect, Donald T. Maharan Associates, in their letter of August 11, 1978 to this office that the bid be awarded to Schreiber Hauling Co., for their net bid excluding Alternate Bid Item No. 2 for the price of \$152,233.00, said bid being the lowest bid meeting the requirements of the specifications. Attached is a resolution to award the bid based on this recommendation with which we concur.

Dear Sir:

We were aware of the pending outdoor Rock Concert. The State Liquor Authority issued a permit for beverages to be served outdoors. I called the SLA to have the permit cancelled but they refused to do so.

I notified the Supervisor's office not to issue authorization to violate the Noise Ordinance.

We added to our regular patrol in anticipation of problems and also notified the surrounding police agencies.

As Ordinance #17 of the Town Ordinance stands: We cannot make an arrest in anticipation of unreasonable loud noise. Arrests must be made at the time of the incident. It is the consensus of the Chief of Police and the Lieutenant in charge at the time, that an attempted arrest at the time of the most complaints, would have resulted in a situation that could have instituted a riot, resulting in injury and excessive property damage.

Nowhere in Ordinance #17 does it state that a permit must be secured.

Penalty of not more than \$250.00 will not deter rock promoters when the profits can be in excess of thousands.

Honorable Town Board Members

Gentlemen:

RE: Award of tire bids

On September 7th, 1978 bids were opened and read at the Town Board meeting for new tires, and tubes. We did not bid or accept any bids for recapped tires as they do not work out in the Highway Department.

The results were tabulated and a copy of the prices are attached hereto.

Therefore, I recommend awarding the contracts to the lowest responsible bidders as shown on the attached tabulated copies. Where bids are identical, I recommend awarding to the bidder circled in red.

I trust this meets with your kind approval.

Very truly yours,
