## INTRODUCTION:

The Industrial Development Strategy Committee has been meeting for over one year in order to provide the Town with a comprehensive and coordinated Industrial Development Strategy for the short and long term.

Communities in Western New York, indeed throughout the Country, have been vigorously pursuing new industrial development. Industry represents a cornerstone to community vitality by providing jobs and increasing tax revenues. Cheektowaga, in the past, has benefited from industrial development by virtue of its advantageous location, superior transportation facilities and abundant industrial land.

However, circumstances have changed; particularly in the past five years. Although land, transportation systems and locational factors remain key to industrial growth, local governments, regional industrial development agencies, and state legislature have been enticing new industry with varying incentive packages. All government bodies and agencies have increased efforts to entice industrial development with promotional information, direct outreach to key industries, and the creation of management and administrative structures that can offer greater flexibility and creativity to encourage new industrial growth.

Cheektowaga needs to enter the era of competition for industrial development. Cheektowaga can not afford to stand-by idly while other local communities encourage new industrial growth often at the expense of the Town.

During the I.D.S.C. work sessions these considerations, among others, were studied to develop a strategy that would assist and facilitate new industrial development for Cheektowaga. Concurrently, the Committee was particularly sensitive to the role and effectiveness of the existing regional industrial development effort (ECIDA) and the need to preserve industrial harmony in region. Also, the Committee accepted the reality that certain industrial strategy elements such as the state tax structure and local tax incentives were either beyond the control of the Committee or the political purview of the Committee.

The consensus of the Committee was that:

- . Cheektowaga can and should increase its efforts to attract new and expanding industry.
- . the effort requires the creation of an administrative and management structure that does not drain current Town fiscal and program responsibilities;
- . a structuring of existing information on industrial property is important to any industrial development efforts and efficient presentation of same;
- . mechanisms for promoting Cheektowaga as a location for new and expanding industry should be coordinated with the Erie County Industrial Development Agency yet be autonomous to enable the Town to independently present its advantages and opportunities thereby having a direct influence on its future; and
- . a promotional document presenting Cheektowaga's assets is necessary to assist in attracting new industrial development.

In light of the extensive information prepared and gathered over the past year, the following summaries have been prepared for the Town Board Members:

- I. Creation of a Local Development Corporation
- II. A. Funding of a Local Development Corporation  
B. Municipal Bonding
- III. Policy Guidelines for Bonding Industrial Development Infrastructure
- IV. Management/Administrative Structure and Twelve (12) Month Work Program
- V. Data Storage
- VI. Promotional Brochure

An appendix document in notebook form presents a more extensive discussion on the above subjects.

The Committee looks forward to meeting with the Town Board on the information and participating with the Town Board on the implementation of the industrial development program.

I. CREATION OF  
A LOCAL  
DEVELOPMENT  
CORPORATION

The Proposal:

It is the recommendation of the Committee that the Town take steps to establish a Local Development Corporation for the Town of Cheektowaga, to aid and assist industrial development and job creation within the Town.

What is  
a Local  
Development  
Corporation:

The L.D.C. is a public benefit corporation, which is governed by the provision of the Not-for-Profit Corporation Law<sup>1</sup>, empowered to foster the public purposes of the development and retention of jobs and industry within its area of operation, in this case, in the Town of Cheektowaga.

Why a Local  
Development  
Corporation:

At the present time, the Town of Cheektowaga is not involved with any agency, internal or external, which has a specific interest in the development of industry and jobs within the borders of the Town. While the Town is entitled to participate in programs now offered by other agencies of government involved in industrial development (eg. E.C.I.D.A.), these agencies have a wider geographic mandate and are therefore unable to implement policies which are specifically attuned to the needs and wishes of Cheektowaga.

Because of this problem, certain local municipalities have "opted out"<sup>2</sup> by petitioning the legislature to create local I.D.A.'s to serve those communities. Others, however, have been able to meet local needs in conjunction with the E.C.I.D.A. by means of establishing L.D.C.'s, or by making use of an existing L.D.C. within the municipality.<sup>3</sup>

Because of the competitive situation among areas attempting to attract industry, a phenomenon that has become almost universally applicable within the past 5 years, it is the feeling of the Committee that the lack of any administrative body responsible for attracting industrial developers to the Town, and the lack of such

a body as a focal point for inquiries regarding the general and specific issues which would be of interest to a developer, the Town is not competitive with others. It is the further feeling of the Committee that the L.D.C. is the most desirable mechanism to implement an industrial program, for the following reasons:

- No need to petition the legislature for specific enabling legislation;
- Ability of the L.D.C. to apply for New York Job Development Authority Funding in relation to area projects, on behalf of developers who might not otherwise have access to such funding;<sup>4</sup>
- Enhancement of the Town's competitive situation as against other area communities, which are Cheektowaga's main competitors;
- Enhancement of the Town's abilities to exploit its advantages as a major transportation site, by means of the publicity function;
- Availability of direct involvement in finance-structuring for proposed developments within the Town;
- Centralization of administrative abilities;
- Autonomy and insulation from political pressures which would otherwise be brought against the Board if the Town were to undertake what direct involvement might be open to it;
- Flexibility, through wide powers and functions granted to the L.D.C. by law.<sup>5</sup>

Make-Up of the  
Local  
Development  
Corporation:

It is anticipated that membership in the L.D.C. will be open to all industries, businesses and residents of the Town, whose membership shall be in the form of a "sustaining membership," lending both moral and financial support (via dues payments) to the organization.

Functioning of  
the Local  
Development  
Corporation

Policy shall be determined by the Board of Directors, with input from interested members and Town Officials. It is anticipated that the Board shall be composed of at-large directors, appointed by the Town Board, and that the members of the Board, or a designated number of such Town Board members, shall serve as ex officio directors.<sup>6</sup> It is suggested that at-large directorship terms be for a term of 2 years.

What Shall  
the Local  
Development  
Corporation  
Accomplish:

Publicity - Prioritization of Development  
Strategies and Sites - J.D.A. Financing Applica-  
tions on behalf of Interested Developers -  
Administration of Funds established to assist  
Town industrial and job development - Assistance  
in various other financing application for  
developers - Minimizing "Red-tape" as far as  
possible - Access to other means of industrial  
development as they become practical in the  
future.

Can the Town  
Use the  
E.C.I.D.A. to  
Accomplish  
These Aims:

The E.C.I.D.A. will hopefully prove to be of  
great value as a component of the overall develop-  
ment strategy within the Town, as primarily  
a tool to assist in financing, and secondarily  
as a co-developer of industrial and job develop-  
ment strategy in a proper situation. As indicated,  
however, its wider mandate does not suit it to  
assist specific needs of one of its component  
municipalities, making the use of a local agency  
appropriate.<sup>7</sup>

Footnotes:

1. See N.P.C.L. Sec. 1411.
2. "Opting out" may be a bit imprecise, as those localities which have established local I.D.A.'s, eg. Depew, Lancaster, have not cut themselves off from E.C.I.D.A. involvement, but is the feeling of the Committee that the services offered, while local in scope, tend to duplicate some of what is available from E.C.I.D.A.
3. Buffalo has established its own L.D.C., now involved in the William Street Industrial Park in conjunction with E.C.I.D.A.; Tonawanda is involved in a continuing use of its L.D.C., established in the late '40s or early '50s.
4. See Public Authorities Law, Article 8, Title 8, re New York State Job Development Authority.
5. See N.P.C.L. Sec. 1411, Subsecs (a) and (c).
6. Permitted by N.P.C.L. Sec. 703.
7. Eg. William Street Industrial Park, which is a co-operative function of the E.C.I.D.A. and the City of Buffalo's L.D.C.

## II. A. FUNDING

Introduction: Three considerations impacted on the level of funding requested:

1. Reasonableness: the number of dollars required for assignment to the Industrial Development Program must not adversely impact other projects and programs carried out by the Town; yet, enough dollars must be available to assure successful implementation of the Industrial Development Strategy.
2. Impact: in light of potential leveraging strategies and incentive programs that are available to industry, the sum of dollars must be significant enough to meet the development costs inherent to new and expanding industries.
3. Options: without the benefit of knowing, either the number of industries or the respective financial needs of prospective industries the appropriation must be large enough to accommodate a range of alternate needs that may arise.

Fiscal  
Leveraging:

Fiscal leveraging strategies considered by the Committee most relevant to securing new industrial development for Cheektowaga generally results in an 80/20 or 70/30 ratio (20%-30% "public" dollars; 70%-80% "private capital").

It is the studied opinion of the Committee that an allocation of \$100,000 represents an equitable funding level that will sustain the considerations of reasonableness, impact and option. Under optimum conditions (i.e. through participation with N.Y.S. Jobs Development Authority) \$100,000 may be used to generate \$1,000,000 of development; less favorable leveraging may result in \$700,000 of private industrial capital.

The I.D.S.C. is very concerned about future funding levels in order to carry-out the full intent of industrial development strategy. Consequently, the Committee has established two resolves implicit to the receipt of the \$100,000 funding request:

1. All monies used for industrial development projects will be "loaned" money with a repayment in full of loaned principal; and, the Committee shall endeavor to generate working capital for carrying-out the industrial development strategy by assigning nominal interest charges on the loaned principal to cover operating expenses inherent in carrying-out the industrial development strategy.
2. All dollars assigned to the industrial development effort will be used to benefit those industries that wish to locate or expand in Cheektowaga. Second party agreements between the funding recipient (i.e. Cheektowaga Local Development Corporation) and other agencies or bodies promoting industrial development in Western New York will require the recipient to demonstrate how the Town of Cheektowaga will directly benefit from such an agreement.

As a final consideration, the Town may contract with the proposed operational arm of the Industrial Strategy Committee (i.e. an L.D.C.; see Section I.) for promotional services for an amount not to exceed \$3,000. However, the Town can not loan dollars or provide grants to a L.D.C. from customary Town revenue sources.

Therefore, the Committee herein requests an allocate of \$100,000 from the Town's Community Block Grant Funds to carry-out an Industrial Development Program. The allocation represents an eligible activity pursuant to Section 570.203 and 570.204 of the Federal Administrative Regulations for Community Development Block Grants.

I. B. MUNICIPAL  
BONDING

The Committee has studied various alternates to encourage industrial development in Town. A number of the incentives used by other communities to attract new industry rely upon tax forgiveness, in one form or another. The Committee has dismissed any form of tax forgiveness as being unacceptable for the short or long term.

On the other hand, after a thorough review of the implications to the Town - both fiscal and administrative - the Committee has determined that Municipal Bonding on behalf of a private developer offers a number of benefits to the Town and developer with no disadvantages to the Town.

Benefit to  
the Developer:

To the private industrial developer, Municipal Bonding offers an attractive interest rate, an opportunity for balloon repayments (interest in the first years with graduated interest and principal payments in the latter years) and the outright knowledge that the Town is interested in the future success of the project.

Benefit to  
the Town:

To the Town Municipal Bonding has no direct fiscal impacts. In most all instances that can be anticipated, the Municipal Bond will represent a nominal increase on the Town's current indebtedness thereby having no measurable impact on its bond rating. Further, since the repayment of interest and principal is the sole responsibility of the developer, Town residents are not bearing the fiscal burden of the Bond. Finally, since the purpose of the Bond is to position a site for subsequent development, the true impact (benefit) to the Town is future tax revenues which will be greater than the cost of the Bond.

Review of  
Proposals:

The Local Development Corporation and its inherent administrative/management structure is proposed to be the review body for which all requests for assistance will be channelled. The L.D.C. will have the technical resources available to provide the Town Board with a thorough review of the request, presenting both advantages and disadvantages. (See Section III. Policy Guidelines for Bonding).

III. POLICY  
GUIDELINES  
FOR BONDING  
INDUSTRIAL  
DEVELOPMENT  
INFRASTRUCTURE

It is appropriate for the Town Board to consider the adoption of Policy Guidelines which can be used to evaluate a request by a developer for bonding assistance for the installation of roads and infrastructure.

There are certain considerations which at the outset will weight heavily by the developer prior to initiating a request to the Town for bonding assistance.

First, the developer must be able and willing to assume the additional principal and interest payments over the term of the bond.

Should the Town be willing to bond on behalf of a developer it is not a give-away program; the developer is legally responsible for the full payment of the bond.

Second, there is no advantage to the developer to attempt to secure a bond if he is unable to meet the financial obligations.

For example, if the developer's property is suitable and marketable for industrial development and he is unable to fullfill the additional cost of a special assessment (i.e. bond) he will lose the property to foreclosure, thereby, losing previous equity investment in the property.

Nevertheless, it remains appropriate for the Town to establish specific eligibility (Policy) Guidelines for bonding infrastructure on behalf of private developers. The following are suggested Policy Guidelines:

1. A project development site must be 25 acres or greater.
2. Bonding cost (i.e. interest and principal repayments) must be assumed totally by the project owner(s).

3. The ratio of bonding to projected building construction (i.e. capital investment) may not exceed 10%.
4. All engineering costs, map plan reports and other costs necessary and appropriate to facilitate the sale of a bond(s) will be paid by the developer.
5. The proposed project must be consistent with the Town's overall development strategy including the master plan and zoning ordinance.
6. Bonding on behalf of a developer will be limited to industrial uses only. Commercial and residential infrastructure and appurtenances thereto are ineligible for bonding.

Finally, it is important to bear in mind that bonding on behalf of an industrial developer is an investment in future tax revenues. Since infrastructure costs typically represent a nominal cost against the full project development cost, and since the bond is not a direct charge to the Town or its taxpayers the recurring tax revenues can only be considered an asset against which there is no measurable financial liability.

IV. A MANAGEMENT/  
ADMINISTRATION  
STRUCTURE AND  
12 MONTH WORK  
PROGRAM

Introduction:

Creating the tools to carry-out an industrial program and funding that effort, though important in and of themselves, does not ensure a viable industrial development effort. Rather, the success of the program is intricately tied to an effective and efficient administration structure and an achievable work program.

The structure recommended herein is believed by the Committee to be the most effective framework for ensuring long term stability and viability for the Town's industrial growth.

A. Recommended  
Management/  
Administrative  
Structure:

1. The creation of a Local Development Corporation (See Section I.) to oversee the implementation of the Industrial Development Work Program.
  - a. Representation of the L.D.C. Board of Directors would be comprised of business and community leaders from various disciplines. The participation of lawyers, bankers, real estate and business persons is recommended.
  - b. The Board of Directors would serve at the pleasure of Cheektowaga's Town Board.
  - c. The responsibility of the L.D.C. are further defined in Section I.
2. One staff person would be identified as the key focal person for receipt of inquiries, respond to information requests, convene meetings, direct intendent developers (industries) to technical support personnel and prepare documentation for the L.D.C. agenda.

Proposed Twelve  
(12) Month  
Work Program:

- Task 1. Identify the Top 10 Industrial Property Owners in Cheektowaga and establish a working relationship with that group to identify specific needs that can be met through the L.D.C. structure and recommend same to the L.D.C. Board.
- Task 2. Maintain continuous communication with Cheektowaga's industries to ensure that future expansion needs can be accommodated in Cheektowaga.
- Task 3.
  - a. Maintain current and up-to-date data on growth industries both in Cheektowaga and elsewhere.
  - b. Prioritize communications with those industries to ensure they are familiar with the benefits and resources available in Cheektowaga.
- Task 4. Establish liaison with the Erie County Industrial Development Agency to familiarize them with the Town's effort and coordinate prospective new and/or expanding industrial activity.
- Task 5. Receive all inquiries regarding industrial development, review requests for financial assistance and prepare summaries for presentation to the L.D.C. Board, and direct all requests for technical assistance to the appropriate agency or personnel.
- Task 6. In general perform those duties necessary and appropriate to encourage new industrial development and the retention of existing industry in Cheektowaga.

V. DATA STORAGE,  
COORDINATION  
AND TABULATION

Implicit in serving the needs of prospective industrial developers is providing accurate and useful information. Over 140 sites in the Town have been catalogued as potentially appropriate for industrial development. The sites range in size from 1 acre to 75 acres. In addition, some 25 variables have been tabulated for each site ranging from site dimension and zoning to topography and infrastructure.

Consequently, 3,500 pieces of information have been collected on Cheektowaga industrial property.

In light of the volume of information and the quick response time required to service inquiries, it is appropriate to consider a modest computer terminal for retrieval of the data. The current state of the art provides a variety of affordable computer systems. In addition, the availability of an in-house computer suggest the option of a remote terminal compatible with the current Town hardware system as an alternate consideration.

An investment of \$3,500 will purchase an independent computer system and printer with the storage volume and software appropriate for the Industrial Development Program. On the other hand, hardware that is compatible with current Town equipment may be less expensive; however, the software (program) for that system is more expensive than the less elaborate home/business commercial computers.

The Committee has not formulated a specific recommendation on the hardware or software alternates at this time. However, in light of the variety of potential applications for the suggested computer it is the Committee's studied opinion that a computer terminal and printer would be a practical investment.

VI. PROMOTIONAL  
BROCHURE

Reaching out to prospective industries that may be considering new locations to take advantage of a new market, or a new location to accommodate an expanding facility, is a critical element in promoting industrial development.

Consequently, first impressions are important. The Committee has prepared a tasteful, informative, quality brochure that portrays the Town in the most positive image.

The brochure has been designed to permit inexpensive mass distribution by mailing through a standard #10 envelope. Or, the brochure may be left with a local businessmen after preliminary information meeting.

The information presented in the brochure achieves the following:

- . highlights the many community and physical benefits of Cheektowaga.
- . portrays the Town as accessible to a large and growing market area
- . visually defines the abundance of developable industrial property
- . approaches the industrial solicitation business up-front; recognizing every community wants new industry yet Cheektowaga can compete with the best
- . provides a telephone number to contact for further information

NOTE: A printed mock-up of the brochure will be presented to the Board on Saturday, November 13 for comment.

## A Letter from the Chairman of the Cheektowaga Industrial Development Committee

When the Town of Cheektowaga first considered promoting its exceptional location and resources to encourage industrial development and expansion our immediate consideration was:

Why Cheektowaga as compared to anywhere else?

The question, as answered quickly and with overpowering evidence is:

Cheektowaga offers more and better opportunities for new and expanding industry than any community in Western New York.

Cheektowaga can claim this because we know a community must provide more than economic opportunity to warrant consideration for new major investments.

A community must provide more than just good government services, recreation and public facilities; there must be more than just a choice of entertainment, cultural, medical and personnel services, and a low tax rate; Cheektowaga offers all of this and more.

Cheektowaga has the best transportation systems found anywhere. Cheektowaga has the largest variety of accessible industrial land (over 17,000 acres) with public services, found anywhere.

Cheektowaga has the most favorable indebtedness of any community in Western New York; to you that means assuredness in your fiscal planning. Most importantly, we guarantee cooperation to eliminate timely and costly delays from bureaucratic red-tape; more than that, we guarantee your development will not be delayed by government haggling.

Don't just consider Cheektowaga as another community reaching out for new and expanding industries. We are a matured community that can provide you with greater accessibility to more market areas than you may have imagined possible. And, we have a sophisticated computer system that can tell you everything about any industrial site in Cheektowaga . . . in seconds.

We are here to service you and be a part of your growth.

Do more than call us . . . visit us . . . we will show you.

### Why Cheektowaga is right for your future:

#### Land Availability:

- Over 17,000 acres of land available for industrial development.
- Sites are serviced with sewer, water and sanitary systems.

#### Site Accessibility:

TO THE SUPERVISOR AND  
HONORABLE TOWN BOARD MEMBERS  
TOWN OF CHEEKTOWAGA

RE: Work Uniforms  
Award of Bid

Gentlemen:

At the regular Town Board Meeting of December 7, 1981, bids were received and opened for the furnishing of work uniforms to Town employees as required thru the Cheektowaga Employees Association Agreement. Six (6) bidders submitted bids on six (6) items of the specifications. The totals of the bids submitted are as follows:

<u>BIDDER</u>	<u>TOTAL BID</u>
Eastern Uniform Company, Inc.	\$13,460.00
Steinwachs Safety Supply, Inc.	\$13,772.50
Amherst Wholesalers Inc.	\$13,957.50
Buffalo Wholesale Textile & Footware Inc.	\$14,162.50
Troy Work Clothing & Uniforms	\$14,410.00
United Uniforms	\$14,498.00

The second low bidder was selected after we compared quality and workmanship of the samples of brands of clothing submitted by the three (3) low bidders. We used the expertise of another bidder who was not in the running for the award, and based on his judgment, the samples submitted by the second low bidder did meet the requirements of the specifications and were of good quality and workmanship.

It is recommended that each Department Head specify the brand of "Five Brothers" for pants and shirts and "Work Wear" for coveralls when ordering the uniforms for their employees.

TO THE SUPERVISOR AND  
TOWN BOARD MEMBERS

January 14, 1982

Regarding: Petition of Mr. Joseph Urbanik to rezone  
3617 Genesee Street from the M-1 to the CM District.

Dear Honorable Town Body:

The site plan submitted for this proposal by the petitioner along with his written commitment that no collision work will be done on the premises and that no more than fourteen (14) automobiles will be on display for sale at any one time is acceptable to this Board.

This rezoning request is compatible with the surrounding development and the automotive use restrictions now in effect in the CM District of the Town Zoning Ordinance are such that an orderly operation can be insured.

This Board recommends approval of this application but our recommendation is contingent on the approval of the off-street parking plan by the Town Buildings Inspector.

RE: Change Order No. 3  
Beach Road Drainage  
Improvements, Phase II

Gentlemen:

The consulting engineering firm of McFarland-Johnson Engineers, Inc. have recommended the approval of Change Order No. 3 for the above referenced project for an addition of \$12,598.92 to the contract of Knab Brothers Inc. Said Change Order No. 3 involves the following items:

Purpose No. 1 - Provide for the installation of 194 L.F. of 8" diameter P.V.C. sanitary sewer along the easterly side of Clearvale Drive, between Pinevale Court and Fairvale Drive, where a conflict in grades discovered during storm sewer installation made reconnection of existing sanitary house laterals to the existing sanitary sewer impossible. The resulting cost of this work is (+) \$10,399.74.

Purpose No. 2 - Provide a money credit of \$2.98/L.F. to the Town for Class III 24" X 38" elliptical R.C.P. supplied in place of the specified Class IV pipe. Timely delivery of the Class IV pipe could not be obtained and would have resulted in a substantial delay in the ongoing project. Total money credit for Purpose No. 2 is \$882.82.

Purpose No. 3 - Provide for the relocation and reconnection of an existing 8" diameter V.T.P. sanitary sewer, east side of Beach Road, to an existing sanitary sewer manhole on Beach Road, north of Fairvale Drive due to a conflict in grade between the new 36" R.C.P. storm sewer and the existing 8" V.T.P. sanitary sewer. Said sanitary sewer serves the first three (3) homes north of Fairvale Drive, east side of Beach Road. The resulting cost of this work is \$3,082.00.

HONORABLE TOWN BOARD MEMBERS

The Base Bid was for the provision of 8" diameter ductile pipe throughout the system. The Alternate Bid provided for the use of 12" P.V.C. pipe for the Aero Drive portion of the project. This calls for the provision of a water-line from Sugg Road easterly to Rein Road. This larger pipe was specified at the request of the Erie County Water Authority so that it eventually would connect the 16" water main on Sugg Road with the 24" main on Transit Road.

All bids were reviewed by the consulting firm of Nussbaumer & Clarke, Inc. and it is the recommendation of said engineers and ourselves that the bid be awarded to M.C. Morgan Contractors, Inc., 3690 Sheridan Drive, Amherst, New York 14226 for submission of the lowest bid meeting all requirements of the specifications. It is also recommended that the contract be awarded for the Alternate Bid being in the amount of \$238,526.55. The acceptance of the Alternate Bid with its 12" diameter water main will be beneficial to the area in enhancing future development. Acreage between Rein Road and Transit Road along Aero Drive is zoned for M-1, Light Manufacturing.

Very truly yours,

TOWN OF CHEEKTOWAGA

- 2) The area shall be reseeded in accordance with the attached letter from Merriman Conservation Consultants Inc.
- 3) All debris (i.e. brush, small trees associated with this stockpile) shall be removed from the site and be properly disposed of.
- 4) The removal activities shall not cause any inconvenience to the tenants or any nuisance (dust, noise, etc.) to neighboring property owners.
- 5) Removal activities shall be confined to property owned by Mr. Russo and shall not encroach onto lands recently acquired by the Town of Cheektowaga for storm water retention purposes.

Gentlemen:

In order to proceed with the demolition program at the Plant #5 site, it is necessary to reorient the electrical system on site.

Until the construction of the Main Pump Station, the main feed to the Wastewater Treatment Plant was through the old pump station. It is necessary to disconnect all electrical feed into this building so that it can be demolished at a future date. To do this, we propose to extend power into the remaining Plant #5 structures through the new Main Pump Station.

It is recommended that the Town Board approve the proposal of Nussbaumer & Clarke, Inc., in the amount of \$3,680.00 for the preparation of plans and specifications and for the provision of services during construction for these electrical modifications at the Plant #5 site.

Dear Honorable Town Board;

Our concerns regarding land use of this petition have been resolved on the enclosed revised Development Plan.

It is our recommendation that this petition be approved under section 10-10 as to land use. However, it is recommended that the final decision be based on the report from the Traffic Safety Commission as regards to ingress and egress of the slow acceleration equipment that will be housed on this parcel.

Yours very truly,

ITEM I Proposed rezoning of 14.77 acres of the Losson Green Estates Subdivision from R-Residential to RA-Apartment to allow for construction of "townhouses."

The proposed project was revised and presented by Jack Patterson of Bella Vista Development. The revised project indicates 138 units to be constructed.

Determination: Non-significant

ITEM II Proposed rezoning of 9+-acres of vacant land located at 2067 Old Union Road. The C.M.H. Company, Inc. is asking for a rezoning from MI-Light Manufacturing to M2-General Manufacturing to allow for establishment of a storage yard for construction equipment.

Determination: Non-significant, providing the natural drainage systems are not disrupted (or redesigned to the satisfaction of the Town Engineering and Highway Departments) and that stockade fencing screen the yard from Old Union Rd. as well as landscaping.

DATE: March 16, 1983  
SUBJECT: 2067 Old Union Road  
Rezoning (Richard Metz)  
FROM: D. Metz, Chairman  
TO: K. Meyers  
Town Board

We have reviewed the plot plan and support data for the above noted rezoning and offer the following:

1. The parcel entrance is located off Old Union Rd. at a safe distance so as not to interfere with thru traffic.
2. The triangular areas shown in red on the attached print is Town right-of-way. This area will be utilized by vehicles going in and out of the parcel. This area is generally gravel and dirt with numerous potholes and rubbish and will be traversed in particular by trucks hauling construction equipment.

To correct future problems in the area described under (2), we suggest that the parcel driveway be extended to intersect Old Union Rd. opposite the driveway used by PCI across the street. This location will provide good sight distance in both directions. The driveway should be designed to accommodate large trucks both geometrically and structurally.

Since the proposed extension is on public property, the Town could possibly abandon the property to the parcel owner.
